SUMMARY

- Front-end developer with a strong foundation in HTML, CSS, and UI design principles. I combine technical skills with experience in project management, research, client engagement, and digital operations. My work blends creativity, problem-solving, and a practical understanding of what users need. I enjoy turning ideas into simple, responsive, and clean interfaces.

TECHNICAL SKILLS

- **Front-End Development:** HTML5, CSS3, Responsive Design, Basic JavaScript, Figma prototyping, layout design (Trained through Meta's *Introduction to Front-End Development* certificate) **Tools & Software:** Figma, Visual Studio Code, Git basics, Canva

GENERAL SKILLS

- knowledge sharing, conflict resolution
- Record management
- Rapid relationship building
- Microsoft Office Suite (Word, Excel, PowerPoint)
- Mentorship

Shangi, Nyamasheke, Rwanda (November 2019)

PROJECTS

- **Personal Portfolio Website (Ongoing):** Built a responsive personal website using HTML and CSS. Designed the interface in Figma and implemented sections including About Me, Projects, Skills, and a downloadable CV.
- **Eco Artistry Creations:** Designed branding materials and digital visuals for an eco-innovation project producing ornaments from plastic, glass, and cardboard.
- **Green Fertilizer Project:** Co-led a nationally recognized youth innovation focused on reducing post-harvest loss through the development of eco-friendly fertilizer solutions. Earned national and school-level funding for youth innovation; empowered local farmers and trained youth in climate-smart practices.
